VER. 2024.03.08

Unleash the full power of *Lightning Colonization Tek™* – a proprietary blend of perfectly hydrated sterilized millet and hardwood oak dust for extremely fast colonization and maximized yields.

Mix 5 LBS of substrate for every 3 LBS of colonized grain.

Millet's size maximizes the surface area in which mycelium can grow, and the wood dust ensures the moisture content is perfectly distributed. One of the fastest colonizing blends on the market!

AVAILABLE IN 3 LB BAG

HOW TO USE

- 1 Inject 10 ccs of spores or culture into the bag.
- 2 Store for a few weeks to fully colonize the bag of grain with mushroom mycelium.
- 3 Mix colonized grain and substrate in a monotub or grow bag.
- 4 Store until mixture is fully colonized.
- 5 Allow for air flow in your chosen environment.
- 6 Harvest mushrooms once they fruit.

MAKING MUSHROOMS EASY™

HIGH YIELD

Grow up to 2.5 lbs of dung-loving mushrooms.

SIMPLE SETUP

Grow right in the bag or colonize fully and fruit in monotubs.

VIDEO GUIDES

Step-by-step videos and timely email alerts make growing easy.

LIGHTNING COLONIZATION TEK™

For rapid colonization.

MUSHROOMS SUPPLIES GROWING SUBSTRATE

MUSHROOM TYPE: DUNG-LOVING

Mushroom cultivators will appreciate this sterilized high yield Premium Compost substrate that contains all the nutrients needed to grow incredible mushrooms. This proprietary mix developed by a team of mycologists contains the perfect ratio of premium compost, vermiculite, coco coir, and gypsum needed for growing medicinal and dung-loving mushrooms.

AVAILABLE IN 5 LB BAG

WHY USE MS GROWING SUBSTRATE?

- 🔦 PERFECT FOR ANY PREMIUM DUNG-LOVING MUSHROOM
- 🔦 A PROPRIETARY BLEND OF PREMIUM COMPOST, VERMICULITE, COCO COIR, AND GYPSUM.
- 🔦 LAB-QUALITY BAG WITH 0.2 MICRON FILTER FOR AIR FLOW

GROW KIT IN-A-BAG™ & GROW KIT IN-A-BAG™ PLUS HIGH YIELD GRAIN & SUBSTRATE MIX

MUSHROOM TYPE: DUNG-LOVING

Developed by a team of mycologists, this mix is the optimal blend of sterilized millet and substrate, fortified with all the nutrients mycelium needs for rapid colonization. Millet's small grain size maximizes the surface-area-to-volume ratio and holds its shape during sterilization, for strong and fast mycelial growth. The substrate mix contains the perfect ratio of premium compost, coco coir, vermiculite, and gypsum. **GROW KIT IN-A BAG PLUS** features a wider horizontal filter, reengineered to optimize fresh air exchange while maintaining sterile conditions, promoting healthier harvests.

HOW TO USE

- 1 Inject bag with 10 ccs of liquid culture.
- 2 Shake bag when 50% colonized.
- 3 Harvest up to three flushes of mushrooms!

MYCOMULTIPLIER™

INCREASE MUSHROOM GROWTH BY 10% BY PREVENTING "SIDE-PINNING"

Wraps around the middle section of the growing medium to provide the perfect amount of tension prevent useless energy-consuming mini

mushrooms from growing at the inner sides of your bag, without disrupting the network of mycelium.

The unique "x" shape provides better coverage than a traditional rubber band.

INCLUDES 5 BANDS.
